

DHANUSH B K

[Portfolio](#) | dhanushachari753@gmail.com | +919353437587 | Bengaluru

CAREER OBJECTIVE

Inquisitive Artificial Intelligence and Machine Learning Engineering graduate with a good foundation in web development and Machine learning models and a passion for innovative problem-solving

EDUCATION

B.Tech, Artificial Intelligence & Machine Learning 2022 - 2026
RNS INSTITUTE OF TECHNOLOGY | CGPA: 8.3

Senior Secondary (XII), Karnataka State Board 2021
Infomatics National PU College | Percentage: 94%

Secondary (X), Karnataka State Board 2019
Amara Jyothi Higher Primary School | Percentage: 95%

SKILLS

Programming Languages: Python, C++, C, HTML, CSS, JavaScript

Frameworks: React.js, Node.js, Flask, Bootstrap

Libraries: Scikit-learn, Pandas, NumPy, TensorFlow (Keras), PDFPlumber

Data Analytics & Visualization Tools: MySQL, Power BI, Tableau

Development Tools & Environments: VS Code, Jupyter Notebook, Google Colab, Figma

PROJECTS

[HEART DISEASE DETECTION USING MACHINE LEARNING](#)

Developed a predictive model to assess cardiovascular disease risk using patient health indicators. Implemented advanced feature engineering and trained models including Random Forest and XGBoost, achieving high accuracy and ROC-AUC scores. Designed an interactive Python-based system for real-time risk prediction, with data preprocessing, model training, and deployment pipelines using pandas, scikit-learn, and XGBoost.

[DEEP LEARNING BASED IMAGE CLASSIFICATION \(CIFAR-10\)](#)

Developed a deep learning model for image classification using the CIFAR-10 dataset. Implemented and compared Artificial Neural Networks (ANN) and Convolutional Neural Networks (CNN) to classify images into 10 categories, achieving high accuracy through data normalization, model tuning and evaluation using TensorFlow and Keras.

[AI RESUME SCREENING TOOL](#)

Developed an AI-powered resume screening system using Flask, Python and FuzzyWuzzy to automate candidate evaluation through NLP-based resume parsing and skill matching.

[SCHOOL WEBSITE](#)

Designed and deployed a responsive school website using HTML, CSS, JavaScript, and Bootstrap, with features like announcements, gallery, and contact forms, hosted on GitHub Pages for seamless public access.

ADDITIONAL DETAILS - CERTIFICATIONS

- Python {Simplilearn}
- FullStack Development {Udemy}
- PowerBI {InfosysSpringboard}
- DBMS {InfosysSpringboard}
